Acentra HEALTH

Accelerating Better Outcomes

Supporting Rural Health Transformation

Rural communities face severe healthcare disparities: higher mortality from chronic conditions, provider shortages, long travel distances, limited public transportation, and hospital closures. These issues drive overreliance on emergency departments, preventable readmissions, and escalating costs, especially for aging and Medicaid populations in isolated areas.

Acentra Health's proven, compliant solutions can address these challenges through automation, AI-driven oversight, and data analytics to accelerate measurable improvements in beneficiary outcomes while maximizing return on investment and ensuring long-term system resilience.

Rural Healthcare Solutions

Care Management and Care Coordination

Acentra Health's clinical experts create custom care plans and coordinate care across services for people in rural areas. By closing gaps in care, we can reduce emergency room visits by 65%, lower hospital readmissions by 21%, and reduce hospital stays for conditions like diabetes and COPD.

Utilization Management

Our expert clinicians review medical requests to make sure services are truly needed and appropriate, ensuring ongoing care checks and safe hospital discharges. With an 11:1 return on investment, our solution makes the best use of limited resources and avoids unnecessary spending.

Assessments and Eligibility

Acentra Health's Assessments Solution speeds up evaluations, screenings, and waiver eligibility reviews to determine the right level of care for rural beneficiaries. We have reduced wait times for services by 86%, enabling beneficiaries to get the right care as soon as possible, improving access and outcomes, and maximizing use of available funds.

MC-Track® for Managed Care Oversight

Acentra Health's MC-Track® solution ensures Managed Care Organizations are complying with contract requirements in managing care for rural populations with real-time alerts and dashboards to spot rural problems like specialist shortages and excessive drive times.

Provider Screening and Enrollment

Acentra Health's Provider Solution integrates with state, federal, and third-party data sources to screen for fraud, crimes, risky business and familial relationships, and extravagant spending. This protects beneficiaries from bad actors and ensures greater access to quality rural care. Our system streamlines enrollment processes, and our provider services representatives conduct comprehensive outreach to encourage enrollment and ensure network adequacy, increasing access to care in rural areas.
